

## Why grids?

Draw and paint like the professionals! Used by Leonardo Da Vinci and other masters of art to draw and paint with remarkable results, gridding is a technique that helps anyone, regardless of artistic ability, conquer the difficult task of drawing and painting with accurate perspective and shape. Historically, gridding was complex due to math requirements, but we've designed an easy to use gridding system that can be used by anyone regardless of skill to obtain lifelike results in drawing and painting. Gridding is the Artists' secret to accurate perspective and shape.

## What is Paint-By-Grids Software

The Paint-By-Grids Software program is your answer to drawing and painting pictures stored on a computer. Drawing and painting these images is now unbelievably quick and easy. Simply load the image into the software and tell it what size of Paint-By-Grids Canvas you are using and it will apply our grid pattern to your image. Move the grid to achieve the desired composition and you're ready to start drawing. Paint-By-Grids Software even tells you what colors are used in the image and how to mix the colors.

Paint-By-Grids Software is Ideal for images taken from a digital camera or scanner. Drawing and painting these digital images has never been easier. Simply use our 3 step software to load your favorite landscape, pet or portrait and our software does the gridding.

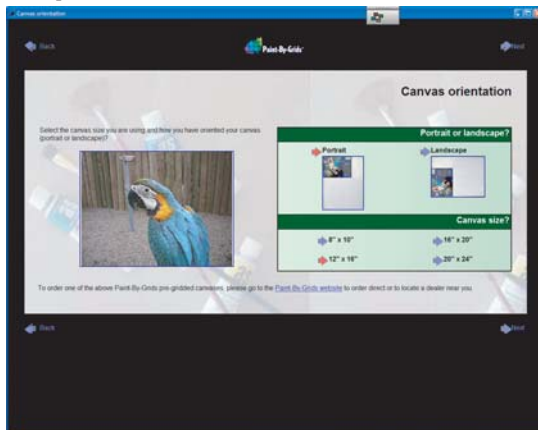

You can even choose to print your gridded picture to your color printer for drawing and painting later or you can choose to draw and paint right from the computer screen.

**Primary Users: Beginning to Intermediate Artists**  
**Secondary Users: Advanced Artists**
